

Bring the Sound

Episode® 800 Commercial Series Pendant Speaker

Perfect for background music and paging applications, Episode® Pendant Speakers feature a wide dispersion that effectively projects sound from tall, open ceilings. Featuring top-grade components and durable construction, these professional-grade products provide quality audio designed specifically for commercial applications.

Engineered for Performance

Equipped with a smart two-way design, these speakers feature premium components, outstanding driver voicing, and a 1st order crossover that together provide improved low-frequency response and sound clarity beyond expectations.

Built Strong

A durable Gripple cable mounting kit ensures that these speakers hang securely from the ceiling, while a magnetic cap hides messy cables for a clean look.

Designed Smarter

All-cardboard packaging makes these speakers an environmentally friendly choice, plus they are UL 1480 listed, meaning they've passed the industry's most stringent testing standards.

Hit the Low Notes

These speakers pair well with our 800 Commercial-Series In-Ceiling Subwoofer for rich, thumping bass and detailed sound.
