AUDIO SYSTEM
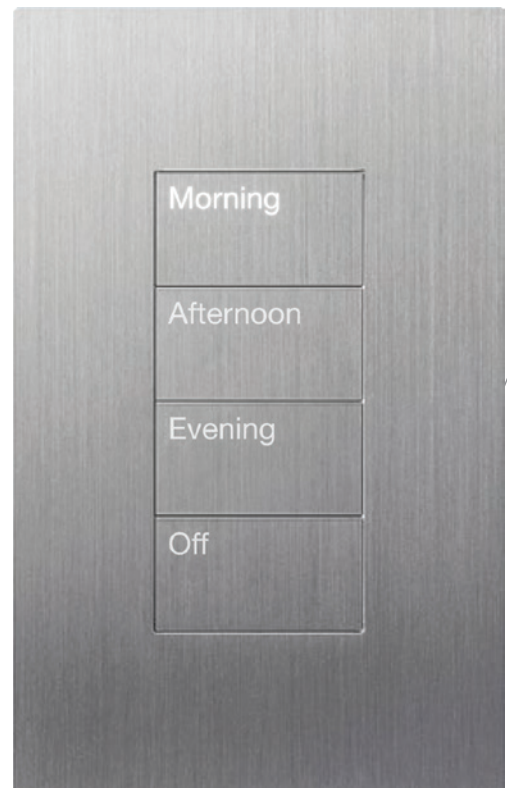

LUTRON
INTEGRATION

Autonomic and Lutron have collaborated to provide integrators with an astonishingly simple, yet powerful interface for the Mirage Audio System. Customers will appreciate intuitive user re-programmable Mirage presets now available on the Lutron HomeWorks QS and RadioRA 2 keypads, with features such as one-button access that will automatically play music in specified rooms at certain volume levels. Changing the preset is as simple as adjusting the content and volume levels with the Autonomic Mirage Media Controller iOS or Android app, and then pressing and holding the desired button on the Lutron keypad to store the scene, much like programming the preset buttons on your car radio.
