

Bring the Bass

Episode Signature Passive Free Air Subwoofer

This 8-inch Passive Free Air Subwoofer brings improved audio to any room. Sound systems with a sub deliver superior audio quality compared to those without, and since this model disappears into the wall or an enclosure, you get big sound in a small footprint.

Built for Performance

Premium components like a polypropylene woofer and ribbed surround create linear cone movement for tighter, cleaner bass and reduced distortion – giving you the sound you want, every time.

Engineered for Versatility

Designed to fit either new construction or retro-fit designs, this versatile sub is out of the way, providing booming bass in a discreet package.

Designed for You

This architectural sub is compatible with a variety of grille options, including round, square, bezel, bezel-less, and black. You get a custom look, your listeners get earth-shaking sound.
