© 2015 FSR, Inc. All Rights Reserved

FSR has the solution for custom AV and Data Plates. The IPS connectivity family is in stock, priced competitively and works well in walls, under table and floor box applications.

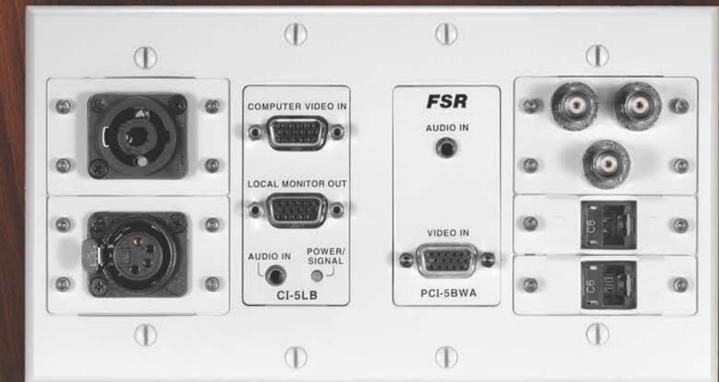

The Wall plates are machined from 1/4" aircraft grade aluminum for a lifetime of service. Our plates are available from single gang up to 6 gangs and mix standard decora openings with IPS openings, an FSR exclusive.

The insert connectors are mounted to steel plates again insuring a lifetime of service. The inserts are available with no labeling, standard labeling or we will custom label them for you.

To make design work easier, visit our web site and try out the IPS Planner. It's a simple drag and drop tool for building wall plates and provides finished drawings as well as a bill of materials.

Additionally, our IPS inserts can be changed at any time for easy upgrade-ability.

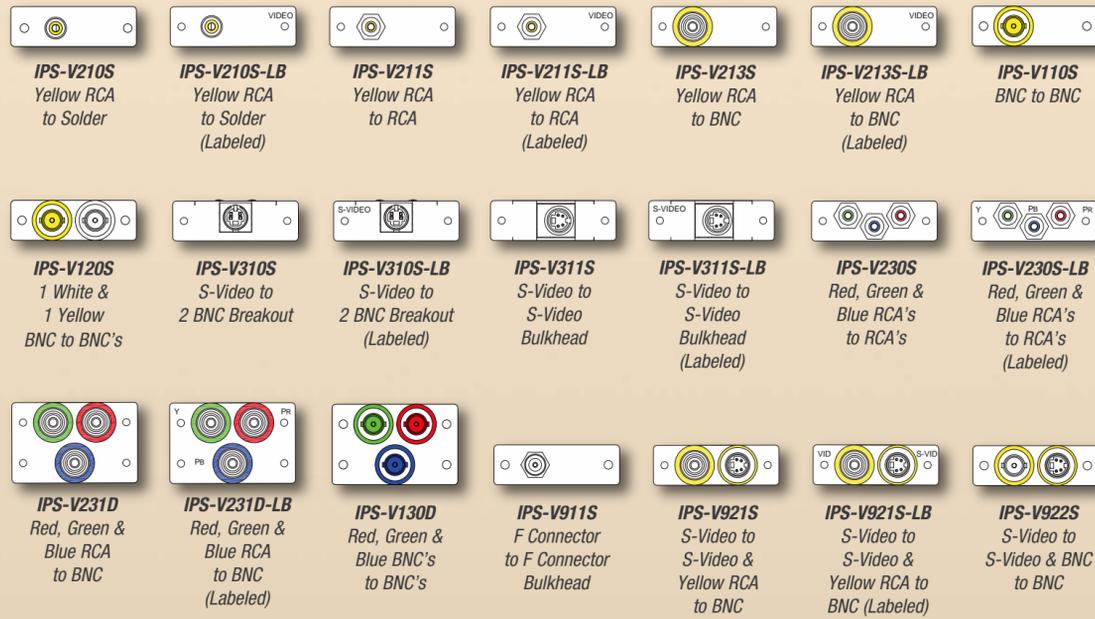

All IPS wall plates and inserts carry a limited lifetime warranty.
