

SSF™ Fiber Optic Cleaning Kit

Part: SSF-CKIT01E

The Cleerline SSF-CKIT01E Fiber Optic Cleaning Kit provides a selection of fiber optic cleaning products utilized during termination and testing. This kit allows easy connector end face cleaning on patch cords and cables, cleaning of tough bulk head and feed thru adapters, and preparation items for termination and splicing.

The CKIT01E kit contains “One-Click” type end face cleaners and Optipop-style cleaner. Along with wipes, swabs, and spray. These tools can be used to clean the majority of connector types and allow for both wet and dry cleaning methods.

All items are contained in a convenient plastic case that keeps the items within neat and organized.

Kit contains no hazardous materials or sprays.
