WATTBOX®

The WattBox Family of IP-Controlled Power Strips & Conditioners

WattBox® power products are not your average power strips. They're uniquely designed with three lines of defense and individual outlet control, to reduce unnecessary truck rolls.

THREE LINES OF DEFENSE

SELF-HEALING AUTO-REBOOT

WattBox IP units continuously monitor connectivity, and when connection is lost, automatically reboots the troubled device as programmed.

MOBILE APP

A free mobile app, included with all WattBox IP products, allows you to reset any device connected to individual outlets, and easily contact your integrator for additional help.

PROTECT YOUR INVESTMENT

Pair your WattBox power product with a WattBox Uninterruptible Power Supply. Our UPS is the world's most flexible battery backup – packed with features to keep your equipment up and running in case of power loss.

REMOTE MANAGEMENT

WattBox comes with an advanced remote management platform, allowing your integrator to remotely reboot devices, modify configurations, update firmware, and more. It even notifies them if a WattBox goes offline or its voltage falls outside a safe range.

FORM FACTORS FOR EVERY INSTALL

No matter your job, WattBox has a product to match. Our 2, 3 and 5-outlet models are perfect for tight spaces, while our 6, 12 & 18-outlet designs help make for an organized rack.
