

## Technical Note

**Product Name:** T10F-22M  
**Technical Note Date:** April 20, 2020

### T10F-22M product notice – MegaTOOLS® new design incompatibility

Kramer has upgraded the design of all MegaTOOLS® size products. The upgraded design is a slightly different shape than the original one. This causes difficulties in installing these products in a TBUS using the current T10F-22M inner frame (revision 0000).

The modified T10F-22M inner frame (revision 0100) is in production now and will fit both the original and new MegaTOOLS® design as well as all DemiTOOLS® size products.

For updates, check the T10F-22M product page on the Kramer AV website:

[www.kramerav.com/product/T10F](http://www.kramerav.com/product/T10F)

The following product revisions are compatible with the current T10F-22M inner frame (revision 0000). Higher revisions of these products will only fit the modified T10F-22M inner frame (revision 0100):

Product Name	Compatible Revision #
DIP-20	0808
DIP-31	0803
VM-2H2	0000
VM-3H2	0000
VM-4H2	0000
