# PLANET WAVES FEATURES

**Headstock Tuner**  
page 40

## NEW! Chromatic Headstock Tuner

The CT-10 was engineered from the ground up to deliver the ultimate silent tuning experience!

Unlike other clip-on style tuners, the CT-10's ultra-sensitive piezo sensor transmits vibration directly into our exclusive software resulting in unsurpassed tuning performance. The low profile, compact design provides an extensive viewing range without cumbersome pivots or joints, which can decrease tuning accuracy. And, the multi-color backlit LCD display makes it quick and easy to tune in dark environments.

Like we said ... it's the ultimate tuning experience!

## INSTRUMENT CABLES

**IN = OUT™ SIGNAL TRANSPARENCY** Nothing should come between your instrument and amplifier—that includes your cable! Ordinary instrument cables can adversely affect or pre-equalize your tone, robbing you of harmonic content and sonic detail. Planet Waves Cables utilize the latest technologies to ensure low capacitance and impenetrable shielding. Lower cable capacitance allows your instrument's brilliance, presence and character to be transmitted to the amp ensuring that the signal going into the cable comes out of the cable with the utmost transparency.

### Custom PRO Series Instrument Cables

Developed for the most discriminating musician, Planet Waves offers the ultimate built-to-last cable line, while accurately transferring all the subtle details of your playing. Custom Pro Series cables feature Amphenol plugs with gold-plated contacts and the "jaws" cable retention system for unparalleled signal transfer and strain relief. Using the latest in cable manufacturing technology, the Custom Pro Series line features a

network of heavy-gauged, ultra-pure, oxygen-free copper conductors for precise signal reproduction.

## INSTRUMENT CABLES

### The Circuit Breaker™ Cable

The Planet Waves Circuit Breaker™ has a built-in mute switch to save your equipment from loud pops and squeals while changing guitars with a live amp. When the button is pushed, the cable mutes while remaining plugged into your guitar, making on-stage guitar changes a snap, and eliminating any chance of sound bursts. Once the cable is muted, remove the cable from the guitar being used and plug the cable into the next instrument. Press the button again to reactivate the cable signal. It's that easy!!!

## CABLE STATION™ SOLDERLESS SYSTEM

### The Cable Station™

The Cable Station allows musicians to make their own custom-length instrument or RCA cables without the mess and hassle of soldering. The cables are simply made by pushing the plugs firmly onto the cable and tightening a screw on the side of the plug. The cable is marked every foot for precise measuring, and with a variety of plug styles, the options are limitless: effects racks, PA systems, guitar pedal boards, DJ cases, studio applications, home theater – you name it. Mix and match instrument, RCA in-line and right-angle plugs at custom lengths for your specific use.

### Pedal Board Cable Kit

The Planet Waves Pedal Board Cable Kit is the ultimate solution for custom-wiring your pedal board or rack gear. Inferior patch cables can cause signal loss and undesirable coloration to your sound. Planet Waves plugs and cables are specially designed to provide the most accurate and reliable reproduction of your sound from guitar to amp and all points in between. Includes 10' of cable, 10 right-angle plugs and a mini cable cutter.

- > Solderless plugs connect to cable in seconds, creating exact, required lengths easily!
- > 24k gold-plated plugs for improved signal flow and corrosion resistance.
- > Cable features a 24 gauge OFC conductor in a low capacitance design with two layers of impenetrable shielding. Planet waves IN=Out™ Technology.

## SNAKES

### Modular Snake System

The Planet Waves Modular Snake System makes it easy to customize the cable configuration to your specific needs. The snakes feature interchangeable break-outs for easy and flexible wiring options utilizing industry standard analog pinouts. It's as easy as choosing the core cable length and the proper break-outs for the situation. Planet Waves snakes are made with our proprietary multi-pair snake cable, featuring oxygen-free copper conductors and 100% shielding in a low noise, low signal loss construction. Additionally, the snakes feature Amphenol gold plated connectors for optimal signal transference, corrosion resistance and strain relief.

**Humidity & Temperature Sensor**

The Planet Waves Humidity & Temperature Sensor (HTS) will help maintain the proper climatic conditions to avoid damage. The Humidity & Temperature Sensor is a precision-designed hygrometer that digitally indicates accurate relative humidity levels ranging from low (under 20%) to 99%. Temperature is displayed in either Fahrenheit or Centigrade ranging from -32°F to 122°F. The design includes a programmable set point that can set the minimum humidity desired. When humidity is below the set point, an icon will indicate it is necessary to use a humidifier. The high and low memory can also indicate the highest and lowest temperature and humidity conditions your instrument has been exposed to, as well as the date and time of that high and low, since the last reset.

TUNERS

**NEW! Headstock Tuner**

The Planet Waves Headstock Tuner precisely tunes guitars, basses and other stringed instruments, utilizing the instrument's vibrations rather than sound. Using a highly sensitive piezo transducer and backlit LCD, the Headstock Tuner allows you to tune easily and accurately in noisy and dimly-lit environments where many other tuners fail. Simply clip the tuner to a vibrating surface of the instrument and tune as usual.

- > Built-in Piezo transducer picks up instrument's vibration rather than sound
- > Multi-color backlit LCD screen makes it easy to tune in dark environments
- > A440 calibrated. May be user-calibrated to any pitch from A435 to A445
- > Requires one CR2032 battery (included)

S.O.S. comes in packers of 5, and cases of 50.

**S.O.S. Tuner with Strobe-On-String Tuning Technology**

The revolutionary Planet Waves S.O.S. Tuners\* pulse two out-of-phase LED light beams directly onto the vibrating string. When the string is out of tune, the two lights will visually dance on the string being tuned. As you approach in-tune status, the movement slows down and eventually stops when you are perfectly in tune. This revolutionary visual tuning system enables precision tuning in silent or noisy environments, without the need for audible sound or sensing of any kind.

- > Accurate to +/- .1 cent.
- > Auto power-off to conserve battery life.
- > Runs on 1 CR1620 battery (included).

\*Available for 6-string guitar in standard tuning and 4-, 5-, and 6-string bass.

U.S. Patent D564,013

**S.O.S. Tuner Quick-Start:**

1. Select string to be tuned with Data Wheel.
2. Pluck the string.
3. Shine the LEDs on the string near the 12th fret.
4. Tune the string until the movement of the light projected on the string slows to a stop.
5. When the movement of the light stops, you're in tune!

**Chromatic Pedal Tuner**

The Planet Waves Chromatic Pedal Tuner is a sweep and strobe tuner with intuitive rotary user interface housed in a rugged, road-worthy metal enclosure. An oversized note name indicator and super-bright tuning LEDs combine to make onstage tuning easy in all lighting conditions. Professional features like true hard bypass for preserved tone and dual 9v AC jacks make this unit at home in any pedal board configuration.

## CAPOS

### NS Dual-Action Capo™

The product of an ongoing collaboration between famed product designer, Ned Steinberger and D'Addario, the patented Planet Waves Dual-Action Capo is not your ordinary trigger-type capo. Compound action reduces the force necessary to open and close the capo. It also eliminates side-pulling the strings out of tune, which is prevalent on other trigger-type capos. Aircraft-quality aluminum construction adds virtually no weight to the guitar's neck when in use and the capo can be clamped on the headstock when not in use. Simply adjust the tactile micrometer tension control so there is just enough tension to eliminate string buzzing and enjoy repeatable, in-tune performance at every fret.

Acoustic/Electric

- > Incredibly easy one-handed operation made possible through patented, compound-action design.
- > Micrometer tension adjustment allows for setting the perfect tension for your instrument; assures buzz-free, in-tune performance at every fret.
- > Designed to fit most 6- and 12-string guitar necks with radiused fingerboards.

### NS Capo™

The NS Capo is the product of an ongoing collaboration between famed product designer, Ned Steinberger and D'Addario & Company. It employs a sleek, ultra-light design for fast and accurate one-hand positioning on the guitar's neck. Just turn the smooth, tactile dial to eliminate the string buzzing and enjoy perfect, in-tune performance. Lightweight aluminum adds virtually no weight to the guitar's neck when in use.

Patent #D521,048S

- > Ultra-light aerospace-grade aluminum.
- > One-hand operation.
- > Fast micrometer screw assures perfect pressure for buzz-free, in-tune performance at every fret.
- > A patent-pending Ned Steinberger design.
- > Designed for 6- or 12-string guitars.
- > Also available for classical guitar.

### Ratchet Capo™

The Planet Waves Ratchet Capo uses a unique ratchet design to lock strings into place at any desired fret. One press of the quick-release lever unlocks the capo for placement around the guitar's neck. Once in place, firmly squeeze capo using the finger tabs to lock the ratchet capo into place.

- > Unique ratchet design with quick-release
- > One firm squeeze of finger tabs locks capo in place
- > Lightweight design adds almost no weight to neck of instrument
- > Padded at all points of contact with guitar to prevent scratching or marring of finish

Acoustic Quick Release

The Acoustic Guitar Strap

This patented strap is designed specifically for acoustic guitars and has a built-in, easily detachable, quick-release cord for the headstock. Installing and removing your acoustic guitar strap is a snap. Loop the cord under the strings and through itself, then simply click the quick-release buckle into place; no knots to tie or untie, no need to worry about the cord coming undone while you play. The Planet Waves Acoustic Guitar strap is safe, simple, and allows you to play your acoustic guitar with peace of mind.

### Celluloid Picks

One of the first polymers ever created, cellulose nitrate is made by reacting cotton fibers with nitric acid. Used for more than a century as the base for movie and 35 mm film, celluloid was substituted for natural tortoise shell picks in the early 1900's. Still one of the most popular pick materials available today, they are available in a variety of thicknesses, shapes and colors, and provide a natural feel and a warm, fat tone.

### NEW! Black Ice Picks

Black Ice Picks feature a custom jazz shape that is perfect for fast picking and playing where precise articulation is required. Perfect for both rhythm and lead work, the Black Ice Picks are triple "tumbled," delivering a soft-touch texture that provides an incredibly smooth surface AND superb "grip". Made from Planet Waves Duralin, this ultra-durable material delivers strength, resilience and resists abrasion while providing a balanced tone with a bright attack.

### Duralin™ Picks Standard and Wide Shapes

Duralin (also known as Acetyl or Delrin®) is a unique material with an extraordinary combination of strength, stiffness, dimensional stability, toughness, fatigue resistance, abrasion resistance and low friction. Normally used as a replacement for metal bushings and bearings in industrial applications, this extremely durable polymer is ideal for pick production. Duralin picks allow an artist to highlight the bright "clicking" sound of the pick hitting strings when playing acoustic and rhythm guitar. It is extremely resilient and is also preferred by many soloists for clear articulation on fast single note passages.

\*Delrin® is a registered trademark of E.I. DuPont de Nemours & Co. (Inc.)

### Delflex™ Picks Standard Shape

Planet Waves Delflex polymer picks are injection molded with a blended acetyl resin to reduce cost and improve consistency while being extremely durable and bright-sounding. Unlike picks that are stamped using traditional manufacturing methods, injection molded picks have the same flexibility in all directions. Conventional pick manufacturing methods use roll or sheet film that can have a different feel when rotated.
