

Overview

Thank you for purchasing a great product from Wirepath Structured Wiring. The Wirepath ONE™ Media Shelf is designed to provide stability and flexibility for your equipment installation.

Two shelves are included with each purchase. Each can be mounted on the Mounting Platform or the Module Attachment Holes.

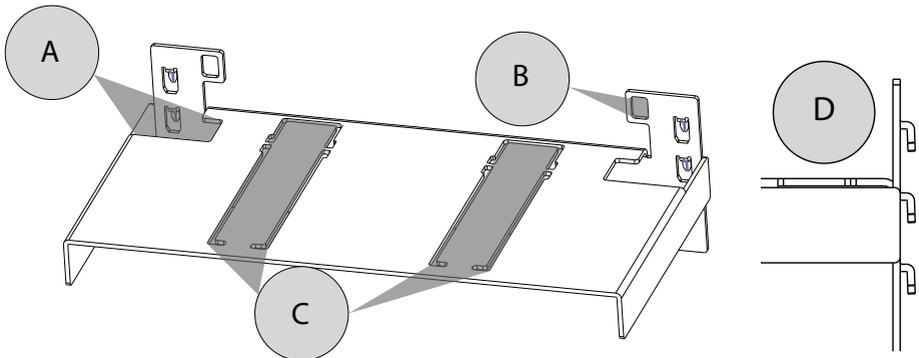

Features

A - Wire Management Insert - Keep it tidy! Direct your wiring through the insertion point to clear up some shelf space.

B - Zip Tie Tab - Keep the wires taught! Use the zip tie tab to keep wiring from getting in the way. The tab sits flush until it's ready for use. Pull the tab forward with pliers to have a zip tie reach around the tab.

C - Support Bars - Keep it secure! Use diagonal cutters to release the support bars, which can hold your equipment in place. Pushing up from below, raise the bars to vertical, then insert equipment.

D - Mounting Hooks - Keep it locked in! Use these hooks to keep the shelf in place and even on the rear module attachment holes. If mounting on a platform, use pliers to recess the center hook into the vertical support.

Limited Lifetime Warranty

This Wirepath Product has a Lifetime Limited Warranty. This warranty includes parts and labor repairs on all components found to be defective in material or workmanship under normal conditions of use. This warranty shall not apply to products that have been abused, modified, or disassembled. Products to be repaired under this warranty must be returned to SnapAV or a designated service center with prior notification and an assigned return authorization number (RA).
