

# MX-990

IR / RF COLOR UNIVERSAL REMOTE CONTROL

## The most advanced CCP-series remote ever

In one decade alone, URC® has delivered more than 100 million remotes throughout North America. The MX-990 is our most advanced remote ever in the Complete Control™ line of products giving your professional installer a whole new level of personalization to suit your home control needs.

Besides having a better form factor, the MX-990 delivers complete control of all kinds of systems—from the most basic to elaborate. You and your family will enjoy stress-free control of virtually every audio and video product you own, all with one button press. Coupled with a URC wireless base station, you can experience the best in control from anywhere inside or around your home. Thanks to the RF technology, you can freely move about your home selecting entertainment components in any room in the house and operating equipment through walls.

## Creative customization

Outfitted with a brilliant 2.4" color LCD screen, the MX-990 sports a 'freeform graphics' feature. This allows your

authorized URC installer to customize your remote's graphics thanks to the greatest flexibility in design and layout.

You can have your system configured so that one button press enables you to fire up your TV and DVD or Blu-ray player for an at-home movie night or any other combination of actions you can think of. Your installer can create time-based actions for the remote to perform, and program how long an action will occur, that you can enable or disable whenever you need to. Plus, there's no need for batteries. The MX-990 sits in a handsome tabletop charging cradle that fits well with any home's existing décor.

# Tech Talk
