

Yale
real Living™

Look Who's Talking!

The most advanced
digital locks available.

ABOUT Digital Locks

Yale Real Living™ digital locks replace your existing deadbolts, knobs, or levers, providing convenient code access to the home. Choose from a beautiful selection of touchscreen, push button, or even key free options in a finish to match your home.

Leading the Way

WAKES with a touch!

Touch screens aren't just for phones and tablets anymore!

Yale offers the only locks with a sleek capacitive touchscreen that wake with a touch and can be programmed in 3 different languages. Code lockout modes, tamper alerts, fully gasketed installation, and 9V battery backup on Key Free Models are just a few of the innovations that separate Yale as the leader in residential digital lock technology.

ABOUT Lock Integration

Yale is partnered with the top security and home automation companies to enable wireless connectivity between locks and other devices in the home. Once connected, Yale locks enable a level of functionality, convenience, and control that no other single device can provide.
